Exhibition Game
Coleman-Lacombe

Canadians Gain Victory by Score
of 4-1 on Tuesday Night—
Banquet After Game

Coleman Canadians defeated Lacombe in an exhibition game here Tuesday evening by a score of 4-1. Joyce of Coleman defence scored two unassisted in the first period, and Jenkins one on an assist from Gate. Stan Wilson scored the only goal for Lacombe.

In the second period, Bill Fraser, centre player for the Canadians, scored brilliantly by going through the entire Lacombe team. The third period went scoreless, and only one penalty was incurred for tripping. Calkins, defence man for Lacombe, tripping Joyce as he was bearing down on Lacombe goal in an effort to score.

Two former Coleman players are on the Lacombe line up, Jimmy Fraser and Charlie Graham, who is manager of Lacombe. Playing against Fraser, Lacombe centre, was his young brother, Bill Fraser, centre for the Canadians. Colgrose played his part in goal for Coleman above criticism, being called on to save repeatedly.

Lacombe line up—Charlesworth; Cook, Calkins; Fraser, Brooks, S. Wilson, Duckworth, T. Wilson, L. Calkins.

Coleman line up—Colgrose; Gardner, Joyce; Gate, Jenkins, Lira, Oliva, Pattinson, Fraser.

Referee—Lou Clary, Coleman.

On Monday evening the visiting team were entertained by William Bell at a luncheon at the Grand Union, and on Tuesday evening Coleman Canadians entertained their opponents at a banquet in the Grand Union, after the game in Coleman rink. Several of them took the opportunity whilst here of going into the International mine

United Church Notes

Morning service 11 a.m., Sacrament of baptism.
Evening service 7 p.m. Favorite hymns will be sung, and the message will be a direct appeal to the congregation for the consecration of their lives to the service of Jesus and building the kingdom of God.

Mr. Hill, a pupil of Mr. Harris, will play a violin solo, "Adoration."

Announcements

Monday, March 9th at 8 p.m., the Young People's League of St. Paul's United Church will present a play "Between the Acts" in the Church club room. Admission adults 50c, Children 25c.

The Coleman Boy Scouts will hold a Benefit Whist Drive in the Holy Ghost Parish Hall on Tuesday, March 10th, at 8 p.m. Admission 35c.

Caledonian Society
Organized Last Week

Dave Gillespie President and 70
Members Will Likely Be
Enrolled

The first general meeting of the above society was held last Friday evening in the K. of P. hall, when between 60 and 70 enthusiastic Scots foregathered to appoint officers and draft rules for the proper conduct of the association and enjoy a social hour together as only Scots can.

D. Gillespie was appointed chairman and stated that the meeting was the result of insistent requests after year for some channel through which Scots in the community could give expression to their feelings and thoughts of the many fine attributes that Scots of the past had handed down to them and considered that the large gathering present ensured the success of the society.

Officers elected were G. Killoch, honorary president; A. Cameron, A. M. Morrison, Jas. Scott, Rev. A. E. Larke, honorary vice-president; D. Gillespie, president; A. McCulloch, vice president; Jas. Parkes, secretary-treasurer; J. Ramsey, J. Russell, A. Irvine, J. Wilson, D. Gardiner, P. Smith, executive committee.

Ladies' section—Mrs. D. Gillespie, convenor; Mrs. M. Wilson, Mrs. J. Kilgannon, Mrs. J. Ramsey, Mrs. J. Anderson, Mrs. A. McCulloch, Mrs. W. Roughhead.

The next meeting of the society will be held the fourth Friday in March and members will receive due notice of time and place of meeting.

A social hour followed, to which the following contributed: Mrs. J. Ramsey, Rev. A. E. Larke, W. Smith, A. McCulloch, J. Russell, J. Anderson and D. Gillespie. Lunch was served during an interval in the program and the balance of the evening was devoted to songs and old time dances. The singing of "Home Sweet Home" and "Auld Lang Syne" concluded a very enjoyable evening's entertainment. —Contributed

Big Score in Hockey Game

Coleman's all star hockey team went to Kimberley last Saturday to play an exhibition game. The journey was made by cars; the roads were rough from Crow's Nest west; the ice was rough; but the boys won by a score of 11-9.

Kimberley has a very fine rink, the boys report. It is not likely that a return game will be played, owing to the uncertainty of good ice. The boys were tired after their round trip of 250 miles.

At Kimberley a number of the Coleman team were very kindly entertained by Mrs. McKinnon, a former resident of Coleman, and her hospitality was greatly appreciated.

Plane Travels Through
Main Street

Lack of markers on the emergency landing field just west of Coleman was the cause of a forced landing being made by a Consolidated Mining & Smelting Co. Ltd. plane on Thursday afternoon. Fortunately the pilot, with whom was travelling Dr. Noidig, in charge of fertilizer experimental work of the company, landed where J. Michalsky's houses formerly stood, without damaging the plane.

It was impossible to take off from the place where the landing was made, and the plane was hauled over two miles to the emergency field where a safe take-off was made. This area affords very few places suitable for landing fields, owing to its mountainous nature, and considerable improvement will have to be made on the field in present use to accommodate large planes.

The plane, with wings folded back, as it was hauled through town by the International mine truck, created unusual interest. It was the first time, and possibly it will not happen again, that a passenger plane was stranded along main street.

A regular meeting of the school trustees was held on Tuesday evening.

Thrift --- Waste

At the present time in all walks of life, individuals, corporations, governments, are deeply concerned over the prevailing business depression, unemployment, loss of purchasing power, accumulation of debts. Everywhere people are seeking to learn the primary cause with a view to applying a cure; they are anxious not only to overcome existing conditions, but to ascertain the cause with a view to preventing a recurrence of such conditions.

Some talk learnedly of the world's supply and distribution of gold, which is the basic standard of all international business. Others complain of over-production, although the more generally accepted view now is that the world suffers not so much from over-production as under-consumption. Enormous war debts imposing heavy taxation on all, are held by some to be the underlying cause. Restrictive tariffs, shutting off nations and interfering with the free flow of trade, are blamed by others. Faulty and unduly expensive methods of distribution from primary producer and manufacturer to the ultimate consumer are responsible, so others contend.

But when all these and a multitude of other things are considered and given their due weight, does not the basic cause lie much nearer home for the average individual? Is it not because of a lack of thrift, the indulgence in habits of waste, that many persons find themselves in financial difficulties?

The writer can well imagine the reader saying to himself that the present is not the time to talk about thrift, when people have little or nothing to save and cannot resist the temptation to have things. But, the writer contends, this is, therefore, the most opportune time to advocate thrift and condemn waste. It would be a mistake to remain silent until times are booming again, because people then are in no mood to listen. It is when a dollar looms up big, big as ten dollars when times are good and business brisk, that people are more willing to give heed to the benefits of thrift. When money comes easily, it usually goes just as easily, but when it is hard to get we are more inclined to hold on to it.

In his autobiography, the late Edward Bok, the famous editor of "The Ladies Home Journal," tells how, when he came to America as a lad of six from his native land (the Netherlands), the most wonderful lesson for him was the necessity of thrift. He had already been taught that thrift was one of the fundamentals in a successful life; his family had come from a land noted for its thrift; but he says, "we had been in the United States only a few days before the realization came home strongly to my father and mother that they had brought their children to a land of waste." Where, says Mr. Bok, the Dutchman saved, the American wasted. There was waste, and the most prodigious waste, on every hand. It was, he says, an easy calculation that what was thrown away in a week's time from Brooklyn homes would feed the poor of the Netherlands.

Continuing, Mr. Bok says: "At school, I quickly learned that to 'save money' was to be 'stingy' as a young man, I soon found that the American disliked the word 'economy' and on every hand as plenty grew spending grew. There was literally nothing in American life to teach me thrift or economy; everything to teach me to spend and to waste. I saw men who had earned good salaries in their prime, reach the years of incapacity as dependents. I saw families on every hand either living quite up to their means or beyond them; rarely within them. The more a man earned, the more he—or his wife—spent. I saw fathers and mothers and their children dressed beyond their incomes. The proportion of families who ran into debt was far greater than those who saved. When a panic came, the families 'pulled in,' when the panic was over, they 'let out.' But the end of one year found them precisely where they were at the close of the previous year, unless they were deeper in debt."

Is it not true,—we ask the question advisedly,—that many of us are in financial difficulty today because, instead of exercising thrift when times were good, and putting aside a little against the day when times might not be good, we spent to the limit of our earnings, possibly beyond, in the belief that times would always be good, and now we are in trouble with no reserve to fall back upon? Is it not true that we were wasteful, perhaps not in big things, but in numerous little ways, carelessly expending a dollar here and a dollar there which, if saved, would have been a veritable godsend now? In these days of world depression, France has been quoted over and over again as the nation least affected and with less unemployment than any other great nation. Why? Because the French people are, notoriously frugal; they save their pennies; that waste little.

But we in this new world, with far greater natural wealth and wider opportunity, are wasteful, extravagant, spendthrift. And the result, when depression comes and with no reserves, we suffer. Is it not, perhaps, the real, unfortunate trait in our people? Think it over, each for himself or herself. And when better times come again, as they will, and work is again plentiful and earnings again rise, govern yourselves accordingly. You are not wasting much now, because you have not got it to waste; continue the habit when you again have something. You are practicing thrift now because you must; continue it even when it is not a life and death necessity. You will then be ready for the next depression; better still, you will ward off such depression.

Waiter (seeing dissatisfaction on guest's face): "Wasn't the dinner cooked to suit you, sir?"
 Guest: "Yes, all but the bill. Just take that back and tell them to boil it down a little."

Young Wife: "I learnt to cook while my husband was abroad."
 Mother: "Well, and what did he say when he returned?"
 Young Wife: "He went abroad again."

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is "Phillips' Milk of Magnesia." It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acid. Correct it once. The symptoms, such as heartburn, gas, headache, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in pill form. Look for the name 'Phillips' and the word 'genuine' in red. (Made in Canada)

Speaks On Arctic Trip

Sir Hubert Wilkins Tells Australia Of Coming Submarine Adventure
 Sir Hubert Wilkins, explorer, told the home folks in Australia today how he planned to sneak up on the North Pole from beneath the sea by submarine.

The proposed submarine trip to the Arctic, the veteran of treks and airplane flights at both ends of the earth said, would "probably be the most adventurous I have undertaken."

With a converted navy submarine, Sir Hubert plans to leave this country about May 1, go to England, thence to Norway and so begin his cruise into the ice fields of the Arctic Ocean.

The submarine is christened the "Nautilus," after Jules Verne's submersible.

The submarine has been equipped with ice drills, capable of boring up through more than thirty feet of ice to reach the air. The tip of the large drill contains a hatch through which the crew can reach the ice and by which air can be brought into the boat when charging batteries.

Lady Wilkins told newspapermen that she would accompany Sir Hubert on his submarine voyage under arctic ice this summer. The object of his expedition to the North Pole is to establish a ring of meteorological buoys to study seasonal weather conditions which may have an influence on the weather far to the South. He eventually hopes to have similar stations circling the Antarctic.

Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, colic, etc., are due to excess of stomach acid. This excess of acid causes the stomach to become inflamed, and the food is not properly digested. The result is indigestion, heartburn, gas, headache, etc. The cure is to take a mild laxative to remove the excess acid from the system. Phillips' Milk of Magnesia is the best remedy for this purpose. It is a liquid, it cannot be made in pill form. Look for the name 'Phillips' and the word 'genuine' in red. (Made in Canada)

Aviation In Alberta

Alberta Flyers Have An Enthusiastic Record Of Performance
 Alberta fliers, fewer in number than those of the majority of the provinces in Canada, are among the most active, to judge from the latest figures from the Department of Civil Aviation, which show that during the year 1930, flights, during which over 1,400,000 miles were covered, were undertaken. Alberta fliers during the year spent 6,415 hours in the air, the average flight lasting for 25 minutes. The planes carried 12,160 passengers.

Persian Balm promotes distinctness, charm and beauty. It is unrivaled in its magical effect on the skin. Swifly absorbed by the tissues, it leaves never a vestige of stickiness. Suits fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

British Air Ministry Has Difficult Task

Every Day Amount Of Sunlight Penetrating City Is Measured
 London is carried out daily at the Air Ministry offices, where the amount of sunshine penetrating the city is measured. The measuring apparatus consists of a small glass ball through which the heat of the sun passes to burn a special paper placed beneath it. The more the sun is being used to compute the amount of sunlight passing through.

A Worth While Achievement

American tourists returning from Europe report that beards are coming back into style. It is doubtful if they will ever again attain great popularity in America. But if some scientist would advise a way to transpire the ever abundant facial hairs of the male to the uppermost portion of his cranium—ah, there would be an achievement.

Discover New Land

New land has been discovered in the Antarctic by the Norwegian whaler, Torly, the whaler reported in a wireless message. The new land, the message said, is a continuation of Mr. Robertson Land, which Sir Douglas Mawson discovered last year.

Government and private steel works in Japan may be merged.

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

MacMillan's Equipment Will Include 'Planes'
 Arctic Explorer Outlines Plans For Trip Into Baffin Land

Donald B. MacMillan, Arctic explorer outlined plans for an expedition into Baffin Land and the North Polar region next summer. The expedition, he said, would be in three sections—the first sailing from Wiscasset, Maine, June 20, to be followed by Dr. Alexander Forbes of Boston and Sir Wilfrid Grenfell, of London. Three aeroplanes will be included in the equipment.

One of the principal objectives, he said, would be the study of glaciers to determine the possibility of the formation of another "glacier age."

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need not cause anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Work For Russian Women

Soviet Government May Employ Women To Overcome Labor Shortage

Employment of hundreds of thousands of women in industries to overcome the present serious shortage of labor, is being considered by the government of the Soviet Union.

With thousands of jobs for which there are no takers, the country today has the greatest shortage of labor in its history. With millions of women inactive it is believed the problem could be solved by pressing them into service. The children would be cared for by the state while their mothers are working.

Nearly all children are subject to worms and many are born with them. Spare them suffering by using Mothed Graves' Worm Extirminator, an excellent remedy.

Canadian Coal

Nova Scotia, New Brunswick, British Columbia and the Yukon produce only bituminous coal; the Saskatchewan mines yield lignite only. Alberta produces bituminous, sub-bituminous, and lignite, and formerly also mined some anthracite.

The chief objection to the school of experience is that it thinks up a new course every time you are ready to be graduated.

London now has 20,000 men on its police force.

Head Colds, Head Migrations, and other ailments, when you have a sore throat, then you will find relief. Real relief—quickly!

W. N. U. 1879

Test Was Convincing

New Foot-Proof 'Plane Will Land Itself Safely

A foot-proof aeroplane which its inventor claims will neither stall, spin or dive and will land itself, is the latest contribution to safety in the air.

While more than a hundred aeronautical experts and financiers watched the 'plane was successfully tested at Glenn H. Curtiss airport, New York. Piloted by Henry Wright, it made a half dozen short flights, and came to a near-perfect landing each time with the pilot's hands high above his head.

The designer is A. A. Merrill, of White Plains, N.Y., formerly in charge of aeronautical research at the California Institute of Technology, and a contemporary of Wright Brothers, Octave Chanute and Langley. He has been working on the 'plane since 1913, and at one time was forced to mortgage his life insurance to continue.

Movable wings which can be adjusted over an arc of 14 degrees are the secret of the plane's stability. In flight these restricted flying surfaces prevent a pilot from unwittingly going into a stall or a dive. In landing, they mechanically level off at the proper distance from the ground and assume the proper gliding angle.

Will Go On Polar Trip

Lady Wilkins To Accompany Her Husband On Submarine Voyage

Lady Wilkins told newspapermen at Montreal that she would accompany Sir Hubert Wilkins, veteran explorer, on his submarine voyage under arctic ice this summer. Sir Hubert said the object of his expedition to the north pole would be to establish a ring of meteorological buoys to study seasonal weather conditions which may have an influence on the weather far to the south. He said he eventually hopes to have similar stations circling the Antarctic.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Alberta-B.C. Boundary

Legislation has been brought down in the British Columbia legislature by Hon. N. B. Loughheed, Minister of Lands, approving the Alberta-British Columbia boundary as surveyed by a joint commission between 1913 and 1924.

Ice boats often attain a speed of 120 miles an hour.

Was Weak and Run Down

Could Scarcely Do Housework

Mrs. Edward A. Allen, Beaconsfield, Alta., writes: "I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework, in fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and I feel sure they will help her too."

Bold by all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Use Of Fertilizers Throughout Western Canada Would Greatly Increase Production

That the use of phosphatic fertilizers throughout Western Canada would increase the acreage yield and would lower the cost of production sufficiently to enable Canadian farmers to better compete with low grain prices on the world market, was the statement made at Moose Jaw by Dr. Ray Neidig, of the Consolidated Mining Conference of the Moose Jaw Agricultural Society, held in the Grant Hall Hotel.

Dr. Neidig was explaining the results of experiments made throughout the prairie provinces during the past four years, to establish the feasibility of using phosphatic fertilizers in increasing the grain yield and promoting early maturity and to illustrate his points, showed actual pictures of fields in the three provinces where the new fertilizer had been used successfully.

Thomas Teare, president of the local agricultural society, presided over the dinner meeting, which was largely attended, while a short address was also given by J. C. Mitchell, Dahinda, former world's "wheat king," who told briefly of personal experiences with the new phosphatic fertilizer, and his belief that it would be a practical boon to Western farmers.

In his opening remarks, Dr. Neidig stated that concentrated experimentation over a period of four years had proved conclusively that when the new fertilizer was drilled in with the grain at the time of seeding, it resulted in earlier maturity and more rapid growth of the plant, while the yield was increased appreciably. Over 400 Saskatchewan farmers had co-operated with the provincial department of agriculture in making trials with the new fertilizer, he stated further, and it was proved that to be effective with grain crops, must be drilled in with the seed.

Showing slides, the speaker pointed out that not only would the loss of crops be avoided but the quality of the grain would be retained. The fertilizer had been used with effect on hay lands with various grass crops, while in Southern Alberta it had been used to advantage on sugar beet crops where it had increased the yield from two to seven tons per acre, and had slightly raised the sugar content, besides maturing the crop from five to seven days earlier than normally.

"So when we realize the interdependence of plant nutritious soils and climatic relationships," he concluded, "We can better understand why the drilling in of small quantities of phosphate with our seed will bring about such remarkable increases in the yield of our crops and their earlier maturity."

Demand For Mutton

Domestic Market Is Increasing According To Latest Figures

In 1927, Canada's consumption of sheep and lambs stood at 6.09 pounds per capita per annum, and by 1930, this had increased to 7.10 pounds. This increase of one per cent, roughly, is seemingly small, but, as pointed out in a circular letter of the Canadian Co-Operative Wool Growers, Limited, it is really impressive. "With our present population of about ten million people the one pound increase represents 10,000,000 pounds or about 300,000 animals or eight per cent. of our total sheep population."

Canadian Potatoes

The total potato production for Canada in 1929 amounted to 39,930,000 cwt., and the onion crop for the same year 590,600 cwt.

"You had leave yesterday afternoon to go to see your doctor, and an hour afterwards I saw you in a cafe with a man, playing cards."

"That was my doctor," Hummel, Hamburg.

W. N. U. 1579

A New Food Product

Experiments Now Under Way To Manufacture Honey-Butter

One of the most interesting announcements in the field of agricultural research and endeavor comes in a recent account of experimental work now under way with the object of combining honey and butter into a food product called honey-butter. This work is now engaging several workers in dairy and honey research and definite results have already been obtained in the direction of producing such a commodity.

The idea, which by the way is Canadian in its origin, is to bring to the market a product which will be used for sandwich and picnic purposes with very definite possibilities of becoming a standard household article. The term honey-butter certainly has a tasty sound about it if this is to be any criterion.

An interesting speculation in connection with this piece of work is in connection with the age old combination of milk and honey as a description of lands of unusual fertility and verdure. Milk and honey have become symbolic of much that is good and their value as nutrients has never been questioned. The combining of honey with the most famous product of milk should certainly give rise to a product of unusual food qualities.

From the standpoint of the beekeeper as well as the dairyman, the establishment of such a commodity should also lead to an increased consumption and wider markets. Honey-butter has been endeavoring for many years to get a wider recognition and use of honey as a food and the turning of a considerable portion of the surplus into the manufacture of honey-butter would probably mean more to this industry than many years of publicity.

We shall be watching with interest for the appearance of this food on the market and let us hope that it proves as palatable as the ingredients would indicate.

Story Of Lost Mine

Reported Discovery Of Gold and Platinum In Alberta Foothills

Has the lost "Leman mine" been rediscovered?

The reported discovery of gold and platinum in the Livingstone range in the Alberta foothills country just south of Turner Valley oil field, has revived the saga of the legendary "lost mine."

Told by old-timers of the district, the story is that a man by the name of Leman discovered a rich white gold mine somewhere west of Nanaimo in 1870. He was aided, it was said, by friendly Indians.

Following the discovery Leman returned to Idaho to bring his wife and family to Alberta, but on the return journey all met death, either by an Indian attack or drowning. White men could never locate the mine, and the Indians alone knew its secret.

Today with the report of a rich find the pioneers of the district recalled the early day legend.

More than 100 claims have been entered in the area, which is 100 miles northwest of Lethbridge.

After 15 years' search, two prospectors of Staveland, Alberta, made the discovery of the gold and platinum bearing veins, and scores have gone into the Livingstone region.

A Worth-While Invention

Written words may be sent over a telephone line by use of an attachment devised by German telephone engineers, who now are testing it. Should the listener have difficulty in understanding a spoken word he asks the speaker to spell it, and it appears before the listener in writing. German long distance lines are expected to first use the attachment.

Goat Raising In B.C.

Interest in goat raising continues at a high point in British Columbia. During last year five herds were entered in the record of performance test for goats, ten head having qualified. The highest test was made by a Nubian doe, "Shirley Roma"—236—owned by Harold G. Morson, of New Westminster, whose milk yield was 2,595 pounds and butter fat 132.4 pounds.

Insurance statistics show that the life expectancy of a boy who lives in the country is seven years greater than that of the city boy.

DANCES WITH PRINCE OF WALES

Miss Betty Gardner, of Brockville, Ont., daughter of Mr. and Mrs. J. Gill Gardner, who was the Prince of Wales' partner for four dances during his recent visit to Kingston, Jamaica, on his trip south to the Argentine. Miss Gardner's father is a director of the hotel at Kingston.

Where Four States Meet

Only One Spot Where Four Boundaries Touch Same Point

At one place in the United States it is possible to stand with the heel of the right foot in one state, with the toe of the right foot in another, with the left heel in a third and the toe of the same shoe in a fourth state. This unique spot is where the boundaries of Colorado, Utah, Arizona and New Mexico meet. It is the only place in the country where four states meet at the same point.

The Soy Bean

Will Sow 20 Acres Of Land In Manitoba With Soy Bean As An Experiment

A special sub-committee of the agricultural committee of the Winnipeg Board of Trade is arranging for the sowing of 20 acres of land with the soy bean, as an experiment. The oils and fats derived from the soy bean are used extensively in industry, while the residue makes a valuable feed for cattle. Hence the effort to produce the bean locally.

FASHION

No. 964—Practical Model. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 936—Slenderizing Silhouette. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 155—Decidedly Chic. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 622—Youthful Jumper Frock. This style is designed in sizes 8, 10, 12, 14 and 16 years. Size 8 requires 1 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting and 1/2 yard of 35-inch lining.

No. 490—For Playtime. This style is designed in sizes 1, 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 39-inch material. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Revolving Loan Plan To Aid Western Canada Farmers Is Outlined By C.P.R. President

A Contribution From Bees

Manitoba Gives Indications Of Becoming the Leading Producer In Canada

The busy little bee in his humble and humming way is contributing his bit to the productive wealth of Canada.

Beekeeping has been advancing with great rapidity in the Dominion, and honey production has become an industry of no mean importance. It is only within recent years, however, that it has developed from being more or less of a hobby into a profitable adjunct to other lines of agricultural endeavour and in many cases is the chief source of revenue.

Prior to 1921, Ontario and Quebec were the only provinces producing a surplus of honey. This surplus found a ready market in the other parts of the Dominion, especially in Western Canada. At that time honey was produced on a comparatively small scale in the Maritime Provinces, in Manitoba, and in British Columbia, while in Saskatchewan and Alberta apiculture was few and far between. Today the situation has greatly changed. Not only has production increased in the other provinces, but it has also made phenomenal gain in the Prairie Provinces, so much so that Manitoba now gives indications of becoming the leading producer of honey, for the Manitoba crop during the 1930 season was estimated to be 10,110,128 pounds.

An indication of the growth of beekeeping in Canada is convincingly given by the following figures of honey production in 1928, compared with those for 1920.—In 1928 the total production was 33,769,649 pounds; in 1920 it had increased to 31,169,635 pounds. The most remarkable growth was in Manitoba, where the production rose from 3,529,512 pounds in 1920, to 10,110,128 in 1928. In Alberta the production jumped from 215,000 pounds to 1,578,900 pounds; in Saskatchewan from 170,287 to 685,551, and in Ontario from 5,000,000 to 12,000,000 pounds. Each of the other provinces scored an advance, but not so marked as that for the provinces mentioned.

The total value of the 1930 Canadian honey crop is placed at nearly \$4,000,000.

New Egg Storage

Air Is Replaced By Carbon Dioxide Gas In New System

Gas storage, a new development in keeping eggs fresh until the market is ready to absorb them, is interestingly described in the current issue of the News Letter of the Dominion Dairy and Cold Storage Branch at Ottawa. Briefly described, the eggs packed in 15-dozen packages and placed in a metal container known as an Autoclave. When these are placed in the storage compartment the air within the Autoclave is pumped off and replaced by carbon dioxide gas. As a further precaution against the presence of oxygen in or near the eggs the air outside the container is also drawn off and replaced by CO₂. Theoretically, and it is proving true in practice, an egg stays fresh directly in proportion to the extent to which it contains CO₂ and the two bug-bears of cold storage, mould growth and fungi, can develop only in the presence of oxygen with a humidity of 85 degrees at temperatures of 33 degrees Fahrenheit or over. Owing to the absence of oxygen no mould growth takes place and the egg comes out of storage in a most attractive condition.

Thirty For Music

"There may be many opinions as to Johannesburg's taste in music," writes a correspondent of The Cape Argus, of Cape Town, "but there can be no doubt of its thirst for it. One can walk from end to end of the shopping centre of the city without ever being out of earshot of one instrument or another. As often as not you will hear them struggling one against the other in a duel of sound."

Double Stars

A considerable proportion of the stars which appear as single to the unaided eye are in reality double, that is, two stars revolving around each other from a common centre of gravity. The secrets of these stars are gradually but surely being unfolded by the Dominion Observatory at Ottawa, and the Dominion Astrophysical Observatory at Victoria.

Czechoslovakia now has 350 football fields, and 1,345 tennis courts.

Proposals in connection with the organization and operation of the Dominion government's \$5,000,000 revolving loan fund to aid Western Canada farmers were outlined by E. W. Beatty, K.C., president of the Canadian Pacific Railways. Mr. Beatty was first proponent of the idea, definitely announced by Premier R. B. Bennett at Regina, December 30.

The railway head offered two major suggestions for officials named to handle the fund, which has been placed in the hands of the newly-chartered Dominion Agricultural Credit Corporation. No burden of handling charges, interest, etc., but rather to provide him with a greater stability in handling power at the very minimum of cost. It must also insure the safety of the investment so that the capital of the loan corporation is not impaired."

"The policy must be operated in such a way," he said, "so as not to impose a burden on the farmer in the matter of handling charges, interest, etc., but rather to provide him with a greater stability in handling power at the very minimum of cost. It must also insure the safety of the investment so that the capital of the loan corporation is not impaired."

He reiterated his belief, first declared at London, Ont., last December, that the plan would "improve conditions under which farm operations are carried on in those districts where its credits can be properly used."

In some particulars, Mr. Beatty thought, the credit body should function similarly to administrators of the "Minnesota plan." He thought it "highly advisable" to adopt the United States minimum and maximum loan clause. This would set loans at \$200 to \$1,000. "However," he added, "I would not favor the granting of the maximum amount except under special circumstances."

Length of time for which the loans are made also might be adopted from the "Minnesota plan," the C.P.R. president said. Under this three-year plan, the farmer would pay back 30 per cent. of his loan after the first year, 30 per cent. after the second and the balance after the third year.

Mr. Beatty asserted the loan plan here would be operated under vastly different conditions than when it met with "amazing success" in Minnesota. "It will be well to remember," he said, "that their record in the matter of repayment of loans has been achieved in the period when prices and other conditions were comparatively good, that they have a great advantage over this country in the matter of population and, therefore, of consumers, and that greater difficulty may be experienced under more adverse conditions."

"This," he added, "suggests the advisability of some conservatism in the extension of credit at the outset at least." Greater safety in the operation of the loan scheme would be achieved through numerous relatively small loans and, though he said it was not yet possible to estimate cost of managing the credit corporation, "it should be urged that all possible avenues be explored with a view to establishing credit facilities at a rate of interest not to exceed six per cent.," said the C.P.R. president. He stressed that the plan is not expected to "work miracles" for the farmers.

"The central idea of the plan should be to seek to develop in favorable communities on the basis of some diversity in livestock, which under different conditions might include two to five cows, one or two sows, 25 to 100 hens and, wherever possible, 20 to 50 ewes per individual farm."

Because most of the people of China cannot afford to buy milk regularly it often is consumed as a medicine or tonic.

"Now you are rich, doctor you do not bother about your patients!"

"You see, I have adopted the system of 'live and let live.' "Gutterres, Madrid.

Dead and Run Down RADIO BATTERIES
AND AUTO BATTERIES
Instantly Charged

"SELF-CHARGE" will charge Radio "A" and all Auto Batteries instantly. Batteries that are Dead—Run Down—Lifespan—even batteries discarded as worthless—are fixed with Pop—Power—Long Life—charge in a few minutes' time, reducing your former battery troubles and charging expense to a minimum. Makes new batteries last for years. So simple, anyone can use it. "SELF-CHARGE" preserves and extends the life of any battery. Works equally well in winter or summer.

Stronger Spark Better Reception

Write Today for Territory

To introduce "SELF-CHARGE"—if there is no agent in your territory—and prove to you that it will do all we claim for it, we will send you a prepaid \$5.00 worth of this wonder-worker for \$1.50 so as you can test your own radio or auto battery and convince yourself. This introductory offer applies to one agent only, and will be withdrawn as agents are appointed.

Write for the exclusive agency for your district and more particulars regarding how you can make big money.

Agents!

"SELF-CHARGE" sells itself! It over 90 per cent. of the battery owners in first demonstration! Why? Because the results are so thoroughly convincing that there is no room for doubt. Be the first in your district. Secure exclusive and protected territory now.

MAIL COUPON TODAY

Make \$15.00 to \$50.00 Daily

SINCLAIRE INDUSTRIES,

Would Go With Wilkins

Hundreds Ask To Accompany Explorer On Arctic Trip In Submarine

More than 1,200 applications have come to Sir Hubert Wilkins from persons who want to go with him on his trip this summer under Arctic ice in a submarine.

Sir Hubert, who has been in New York to examine specially constructed lights which will be the "eyes" of the submarine, said "we have to eliminate those seeking to go only for adventure."

Wilkins said the submarine would begin its voyage from Spitzbergen about July 1 and would cross to the Behring Sea, passing the North Pole in its under-ice trip. A crew of about 20 will be taken in the submarine, Sir Hubert said.

Cereal Research Grows

Steady Increase in Cereal Research Carried On By Department of Agriculture

The report of the Dominion Cerealist, L. H. Newman, B.S.A., for 1929, provides a graphic illustration of the steady increase in cereal research by the Dominion Department of Agriculture. In 1916, the total of plots used in experimental work numbered 2,017. In 1921 this had dropped to only 756. Since 1927, however, there has been a consistent steady expansion in this important work, the total number of plots for 1929 being 18,950. This report, which is now available for distribution, contains a wealth of useful information for those interested in cereal grains.

Marvels Of Marine Life

Fish With "Electric" Power Plants Found In Bermuda Waters

Fleet-finned dragons from over a mile beneath the surface of Bermuda's coastal water, all brilliantly illuminated by their own power plants and never before seen by the folk of our world, are some of the marvels of marine life seen by Dr. William Beebe, who recently returned from his latest expedition to the Nonchuk Island. There he and a staff of fourteen men not only dredged the ocean floor for exotic specimens of marine life but sought them in a diving bell among the coral reefs.

To obtain close views of the fish inhabiting the deeper blue-black waters, the scientist and his co-workers, Orin Gordon and a crew of 14, descended 1,426 feet in a hermetically sealed ball or bathysphere to a point where the pressure on the gauge was approximately 3,100 tons. A new and marvelous world was opened to the scientist when he descended in the bathysphere, for through his circular window of crystal quartz he saw what had been withheld from the human eye since time began.

Darting all about were a thousand lights burning steadily and clear in the inky blackness. These belonged to the illuminating systems of the residents. Some were ranged in rows like the portholes of a steamship, while others burned from filmy antenna far from the body as tiny fish sought to attract its prey. All continued their glow until dimmed by the rays of the searchlight shone through the window. Then, the fish, until then unseen, took shape.

The work lasted six and a half months and was exceedingly satisfactory, as invaluable data concerning the life and habits of known fish were obtained and scores of specimens wholly new to science were brought from the sea. On his return from New York, Dr. Beebe brought back 150 cases containing various species of fish found in the Bermuda area.

China has had at least one famine each year for the past 2,000 years.

SUNDAY SCHOOL LESSON

MARCH 8

THE GOOD SAMARITAN

Golden Text: "Thou shalt love thy neighbor as thyself."—Leviticus 19. 18.

Lesson: Luke 10:25-37.

Devotional Reading: Matthew 5. 38-48.

Explanations and Comments

The Law of Love To God and Man, verses 25-28.—Ong time a scribe, an expert student and expounder of Hebrew law, sought to test Jesus by asking him a hard question: "What shall I do to inherit eternal life?" he queried, and by this he meant: What acts, such as fasts and prayers and sacrifices, would have special merit and would therefore be rewarded by life eternal? "What is written in the law?" How readest thou?" thus Jesus bade him answer his own question. The scribe then quoted Deuteronomy 6:5 and Leviticus 19:18: "Thou shalt love the Lord Thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind (i.e., with all thy powers); and thy neighbor as thyself. That Jesus united the two, love for God and love for one's neighbor, is not surprising, but that the Scribe does so causes one to surmise that it was brought about by some remark of Jesus which is not recorded. "Thou hast answered right; this do, and thou shalt live," said Jesus.

"Oh, runs not thus the lesson thou hast taught?"

When life's all love, 'tis life; aught else, 'tis naught."—Lanier.

What it means to love man, the parable that follows explains, but what does it mean to love God? Dr. Frederick W. Robertson says that it can mean only one thing: God is Character, and to love God is to love character. For instance, God is Pure, and to be pure is to love God. So Whittier, in one of his letters wrote: "I have no consciousness of loving God as a Person, or Power, apart from His attributes. I have no experience or ecstatic emotions, but I know that I love goodness and mercy, charity and peace; that my soul longs for harmony and moral symmetry; that I would sooner wrong myself than my neighbor; and, at times, the sweet sense of an infinite love overwhelms me and finds me with gratitude and thanksgiving."

Racing Trains To Crossings

Foolhardy Motorists Will Get No Consideration in Japan

In the future the motorist who races trains to crossings will do so at his own risk. His heirs will have no claim on any railway company, public or private, if his temerity sends him on a journey he had not expected to take so immediately. The new ruling is a recognition of the fact that this is an age of speed, and that the country will be benefited more by faster train schedules than by preserving the lives of idiots who race trains to crossings.—Japan Advertiser.

She Couldn't Be Hoodwinked.

Miss E. Thomson, of Clapham, writes:—"I find that Carter's Little Liver Pills will do more to keep the complexion clear, and the skin free from blemishes, than all the face cream I have used. I found the real cause of face blemishes was usually due to liver and stomach troubles. My druggist recommended the liver and expelling the constipation poisons from the system."

Take Carter's Little Liver Pills for sick headache and indigestion. All druggists 25¢ and 75¢ red pkgs.

Taking the Census

Army Of 15,000 To Be Engaged In Huge Undertaking

Three times as many persons will be needed to complete Canada's decennial census this summer as Wolfe had when he stormed the Quebec citadel to annex the country to the British Empire, states R. H. Coats, Dominion statistician. On June 1 next a veritable army of 15,000 men and women will begin enumerating the population of the country, gathering eugenic and racial information and social and economic records.

It will be the seventh census since Confederation and will be unique in that unemployment figures will be gathered and information regarding hospitals, asylums and child welfare institutions.

As head of the enumeration and compilation staff, Mr. Coats sought the co-operation of all Canadians, asking that they furnish accurate information when interrogated and expedite proceedings as much as possible.

CHAPTER XII

I'll tell you about it now, Gay, if you'll listen."

It was three weeks later. Nick, dressed for the first time, lay in a lounging chair on the porch, while Gay sat beside him, her usually busy hands idle in her lap—her eyes on the babies at play in the sand pile beneath the trees.

"Sure you feel like talking?" she questioned.

"I'll explode if I don't talk! The way you've bullied me into keeping my mouth shut when there's so much to say, and you must have been thinking such abominable things of me."

Gay laughed.

"I never thought anything abominable at all—that is," she added honestly, "after the first minute when Julie told me that you and Mrs. Halliday had gone alone."

"What did you think then, Gay?" She reached for his hand, as if in atonement for her disloyalty.

"For just a second, Nick, I wondered if you'd deceived me. And then I was ashamed, horribly ashamed to have had such a thought. I knew almost at once that there was some mistake—something you'd explain when you got home. Even when the whole night passed without you, I didn't distrust you again. I told Mr. Halliday that no harm would come to his wife through you."

Nick kissed her hand. His voice was husky when he said: "I wonder how many wives would give a man the benefit of the doubt at such a time."

"But there was no doubt, Nick, af-

ter that first moment. Would you have doubted me?"

He smiled.

"My dear, I wouldn't doubt you if you were gone a week! But that's different. Look here! I want to tell you everything. Of course I didn't misrepresent things. Gay, it was just as I said over the phone. Halliday went to Boston Friday morning, and that afternoon his wife called me up at the bank and asked if I'd dine there. She didn't say he was away, but I suppose I'd have gone in any case. The idea of needing a chaperone didn't strike me. I don't yet. If Halliday were alone and you asked him to dine some night when I was out, do you suppose I'd mind? Her asking me was just a neighborly thing to do."

"After dinner she sang, and I tell you, Gay, it was some treat! She sang a lot of the old songs my mother used to sing—Schubert, and Mendelssohn, and some Irish ballads; and ended with that Gypsy thing she sang the night you cried. Do you remember?"

Gay nodded. Would she ever forget? And Nick went on: "We talked a while after that, and she asked about the road to Mason's Falls—said she expected friends for the weekend, and wanted to take them on a good trip. I wondered a little that she should have company at such a time. For all my Gypsy instincts, dear, I'm a Puritan in certain ways. I think she felt my disapproval, for she made a sort of explanation."

Nick paused a moment, then went on quietly: "Gay, I'm sorry for that little woman. Evidently her husband's people don't like her. I gathered that the mother-in-law especially had, well, made her uncomfortable. She said she couldn't bring herself to go to the funeral, and that Halliday understood, and would prefer that she shouldn't mope round all day and be unhappy. I thought it was rather peculiar of her to try and forget things. I could see she was all cut up."

Gay drew a sudden breath.

"Nick, I don't wish to seem uncharitable, but Julie told me that she heard Mr. Halliday beg his wife to go with him."

"Well, she must have heard wrong then. Mrs. Halliday said distinctly that he didn't want her to. That's not our affair anyway; but—Did you speak, Gay?"

"No," said Gay quietly. "Go on."

"She got out a road map and I showed her the route, and warned her about those hills above Anton Bay. She said that she was a bit nervous about driving, and wished she could find someone for a chauffeur. I suggested Sam Hilton, but she thought they'd have a better time without a stranger along; and then the idea popped into her head to ask me. She said she didn't see why it hadn't occurred to her in the first place."

Gay said as he paused again: "Aren't you talking too long, dear?"

"No, Madam, I'm not," He smiled. "I want to get it off my chest. I hesitated about accepting, of course, because my plans were all made to go to you; but as I looked at those maps, Gay, I—well, I was crazy to go! I don't mean that I didn't want you and the boys, too, but—"

"But you wanted the broad highway more?" Gay questioned as he hesitated. "I'll admit, Nick, that the broad highway, with a woman as pretty as Mrs. Halliday thrown in, would weigh rather heavily in the balance against a tired-out wife and—"

"Gay!"

His voice was reproachful, and she laughed, though the laugh was tremulous.

"I was only teasing you, Nick."

"The pretty woman had nothing

whatever to do with it," he affirmed sternly. "I'm not adamant before those eyes, no fellow with any red blood in his veins would be; but I knew another pair of eyes—well—I've told you all about those hundreds of times. They're the most beautiful eyes in the world. Now are you satisfied? It was the road that cost me, Gay. I suppose it always will. And I remembered your making me promise to tell you if ever I wanted more freedom. It didn't seem a lot to ask when you were coming Wednesday anyway. I don't believe, honestly, dear, I don't believe if I hadn't known you were coming so soon, that the road would have called at all, compared with the call of my precious family. But you were coming, and it seemed a chance to satisfy my craving for a change, and to do a kindness to a neighbor at the same time. So—I telephoned."

"I was terribly disappointed," Gay admitted.

"I knew you were. It made me feel like a slacker—while you were talking; and yet, I didn't think I was unreasonable."

"You weren't, of course. I'm just too silly about you, Nick. He smiled and said: "Keep on that way, my dear."

"Have you forgotten your story?" he reminded him after a minute.

"I had, for the time being. When, after putting up with his shortcomings for four long years, a man's wife confessed that she's silly about him, it goes to his head. And I suppose all this time you're wondering about those guests of Mrs. Halliday's. The truth is, they disappointed her. I didn't see her again till Sunday. I was at the Maxwell's Saturday. Janey called up at noon—said she heard I wasn't going to State Line, and asked if I'd hike with her up Ragged Mountain, and go back to supper there. She was just home and wanted news of you and the kiddies. I had a bully time, and stayed till nearly eleven."

"But—how did you happen to go to Mason's Falls if Mrs. Halliday's friends didn't come? I thought she was taking the trip on her account."

"She was, but she had everything ready, lunch and all, when the message came. I could see she was disappointed, and so was I. When she asked if it would bore me to go with her alone—and if you'd disapprove, well, I suppose I jumped at the chance. I thought we'd be back by five at the very latest, and I knew that you'd be the last one to object. It never occurred to me that Halliday would mind—I mean, mind her going alone with me; and it did seem foolish to give up the trip at that hour, so we went."

His face sobered suddenly. "I wish to God we hadn't," Gay sat still for a moment; then said: "Nick do you remember stopping at a railroad crossing while a freight went by?"

His eyes widened with surprise. "Why—how did you know? I remember because it was there we ran into a funeral, a rather lonely affair with only one shabby hack. For a moment I feared it would bring things back to Mrs. Halliday and make her sad; but it didn't. She thought it rather a joke on us to run into a hearse when we were off a pleasure."

(To Be Continued.)

Little Helps For This Week

"He that hath no rule over his own spirit is like a city that is broken down and without walls."—Proverbs xxv. 28.

Real glory
Reckoned from the quiet conquest of ourselves;
And without that the conqueror is naught.
But the first slave. —Thomson.

Rest not in an ovation, but in a triumph over thy passions. Let anger walk hanging down the head; let malice go manacled and envy fettered after thee. Behold within thee the whole train of thy trophies, not without use. Chain up the unruly legions of thy breast, lead thine own captivity captive, and be Caesar within thyself."—Sir Thomas Browne.

Wagner Festival

Toscanini Will Conduct Performances Of Tannhauser At Bayreuth

Toscanini, Furtwaengler and Eisinger will be conductors at this year's Wagner Festival to be held at Bayreuth. This will be the second year in succession that this honour has gone to Toscanini.

Born in Parma, Italy, in 1867, Arturo Toscanini has had a brilliant musical career. He received his early training at Milan Conservatory and in the year 1908 was appointed to the conductorship of the Metropolitan Opera House in New York, which position he retained until 1931.

To the thousands who attended the festival last year his conducting was a revelation and completely vindicated the faith of those responsible for the breaking of the tradition that only a German was capable of interpreting Wagner.

Boris Hambourg, of that famous Canadian quartette known as the Hart House Quartette, all of whom attended the festival, described the conducting of Toscanini as being nothing short of marvellous. In all his interviews on his arrival at Montreal on the Cunard liner "Ascania," after the festival, Hambourg had nothing but the highest praise for the Italian conductor.

Arturo Toscanini will, this year, conduct all performances of Tannhauser on July 21st and August 1st, 5th, 8th and 17th. He will also conduct "Parsifal" on July 22nd and August 6th, 9th and 19th. It was originally intended that Dr. Muck would conduct "Parsifal," but owing to a very serious illness he has been compelled to withdraw. Dr. Muck is a musician who has been brought up in an atmosphere literally steeped in the Wagner tradition, and it was with great regret that he has had to discontinue his Bayreuth activities.

This year Herr Furtwaengler will be musical director-general of the festival. He will conduct the festival and each Friday during July and August there will be two Cunard-Anchordonald liners sailing from Montreal for Great Britain and the Continent.

Convenient sailings can be arranged to "Tristan" himself, Carl Eisinger will again be the conductor of the "Ring of the Nibelung."

Strange Himalayan Race

High in the Himalayan Mountains there is a mysterious tribe of people living in caves and having no contact with civilization. Little is known about them except that they are, according to the inscriptions on their caves, of Chaldean origin. Their years are nine months long, and many of the members of the tribe are 100 years' old.

The Adventures of
CAPTAIN JIMMY
and his Dog SCOTTIE

Well, boys and girls, so many queer things have happened to us while flying about the world during the last few months, that we just have to tell you the adventures. Some day, perhaps you'll fly over strange countries, too; countries filled with savage tribes and wild animals, and a thousand interesting things one never hears of while sitting at a bath.

Perhaps you'll fly over the clouds at times and look down from them at the wings of your plane just beneath the wings of the sun! Like a big sea of gold and silver in your eyes great fleets of warships in their harbours, so far down that they look like toy boats floating on the rim of a bathtub.

At other times you'll fly over black tropical forests, and follow the white track of unknown rivers under the light of a huge bright moon—wonderful things the living night, where crocodiles lurk in the swamps and tigers and bears hunt through the living night. White faced monkeys swing and jabber in the trees.

You'll see these things, and a thousand more, you'll want to tell the boys and girls you know all about your adventures, just like I am going to tell you mine.

Most of the boys and girls I know call me Captain Jimmy. While my real name is Captain James Harworth Newberry, only the grown-ups call me that. We fly a Vickers plane, by the way, and it's a real beauty. Scottie, one of those plain whistlers dogs known as Scottie Terriers. He looks like an animated bath brush, and he has for sheer personality, he's a dog show all by himself.

Scottie is the first mate and the crew—and what a crew he makes. Scottie, when he was only about six weeks old, and he and I took such other things. You know how it is. Sometimes a dog just doesn't buy him! He picks you up, he looks at me so I wouldn't keep him out of the house. From the day my first ride he has gone everywhere with me—all over Canada, Europe and even Africa.

It was a fine bright morning when we pulled the old Vickers out of her hangar, and he looked at me and headed her out into the wind. Perhaps if we had known all the adventures we were going to meet we would never have left the lot of fun to read of adventures. Actually having them sometimes isn't all it's cracked up to be—and you

often—yes, very often—wish that you were in some nice safe place instead. We had the propeller humming like a giant bee—the even contented hum that is music to an airman—when the ground slid away from under us and we rose into the sky. We were probably going 70 or 80 miles an hour, but it didn't feel so fast as we got further away from the field.

Once in the air, a plane is not hard to drive. In fact, the pilot's seat is the chief control lever known as the "stick." It is a very hard name to remember, but it is a sure and important piece of the plane. When I pull the stick toward me, it lifts the horizontal fins on the tail of the plane, and causes the nose to push up into the air. When I push the stick from me, it pulls the fins down, and of course pulls the plane down too. The foot levers work the rudders at the extreme tail of the plane. When I push the one to the right, the plane turns to the right—when I push to the left, the plane goes to the left. It's exactly like steering a car, only you do it with your feet instead. A round clock on the instrument board tells me how fast I am going—another tells me how high I am in the air. So you see it's all easy enough when you get used to it. Like lots of things that look hard at first. Calgary soon looked like a model city as it faded away behind us.

As we flew over the foothills, the scenery became more beautiful. Wooded slopes, cool ravines and here and there an open valley where the lonely cabin of some homesteader or prospector showed half in the cover of the woods. The shadows began to patch on the sunlit country below—

Scottie seemed to sense something wrong and pawed at my flying suit—as dogs do when trying to draw your attention. Then suddenly "purr!" a gust of wind struck me—then another. Then a rain squall hit us—and in a moment we were in the center of the meanest storm you ever saw. The old ship rocking and tossing like a boat in an angry sea—the sky growing darker every minute—and the rain coming down in sheets amid the blinding stab of lightning. Through the right wing dipped crazily and the plane began to tilt sideways. . . . To be continued next week.

Canada's Leather Industry

The capital investment of the leather industry in Canada in 1929 had a total value of \$27,058,201.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does relieve. It does restore the sufferer to normal body trim and mental happiness.

"In time of trial," inquired the speaker, "what brings us the greatest comfort?"

"An acquittal," interrupted a man at the back of the hall.

Says Depression On Wane

Hon. Gordon Robertson, Minister of Labor, told an audience of women at Montreal, that depression was on the wane and that by May or June this fact would be more generally evident. The minister was addressing the Montreal Women's club and reviewed in detail, the working out of the Federal Government's grant to provinces and municipalities to facilitate public works in the interest of the unemployed.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Twenty-five ships were launched from Belfast, Ireland, in 1929 as compared with 18 in 1928.

Daughter Is
Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

Personal and Local

On Wednesday evening, Feb. 25, intimate friends called on Mr. and Mrs. Lewis Grant to celebrate the seventh anniversary of their wedding.

Mrs. Dr. DeLong returned to Calgary on Sunday afternoon by automobile.

Miss Florence Cox of Pincher Creek was a Coleman visitor on Sunday.

W. Bell went to Calgary on Tuesday on a business trip.

Blotters—This form of advertising is inexpensive and most effective. We will be glad to assist you in preparing copy.—Coleman Journal.

Charlie Graham and Jimmy Fraser of the Lacombe hockey team visited their old homes and renewed acquaintances with old friends.

A daughter was born to Dr. and Mrs. A. F. Gillis, of Merritt, B.C., at Victoria, on March 1. Mrs. Gillis will be well remembered here as Miss Inez Dunlop, daughter of Mrs. R. Dunlop.

The Rev. A. S. Partington suggests that those wishing to remember departed relatives or friends on the anniversary of their death may very appropriately do so by placing flowers on the altar of the church.

G. D. Brophy, district passenger agent of the C.P.R., whose headquarters are at Calgary, and Ronald Greene, C.P.R. steamship passenger agent, of Edmonton, were visiting the Past towns on Tuesday.

Due to lack of space this week, a report of the annual meeting and election of officers of the Board of Trade is held over till next week, for which The Journal asks the indulgence of its readers.

Mr. and Mrs. John Hoggan of Bellevue celebrated the golden anniversary of their wedding in the Oddfellows hall at Bellevue on Friday night, and many from the Past towns were present.

The Young People's League of St. Paul's United Church will stage a three-act play on Monday next in the church club room. The title is "Between the Acts," and they should be accorded a good reception. The proceeds are for the Y. P. L.

Winnie Lightner in "The Life of the Party" furnished a continual round of laughs at the Palace this week, and being a technicolor picture, it was well worth seeing. It was the type of picture that sent everyone home with a smile at the jokes and "wise cracks." This week end there will be shown, commencing to night, Alice Whyte in "Show Girl in Hollywood." Graham McNamee as the News Reel talking reporter is a favorite feature at the Palace, depicting important happenings over the world.

Ernest Houghton, who lives on Sixth street, performed a kind act which is appreciated by all who use the hill on their daily journeyings to and from town. It was covered with loose gravel and stones, causing much discomfort to pedestrians. He cleaned it off and it was a real pleasure to walk on after he was through. The Journal expresses thanks to Mr. Houghton on behalf of all who use this public thoroughfare. If the town council would keep it in its present fine condition, it would be very fine, indeed!

Two "dead game sports" of Coleman, desiring to emulate the prowess of their younger days, staged a hockey game in which they were the sole participants. Modestly forbidding telling how many goals were scored, and unfortunately the press was not invited, therefore an opportunity for a real good story went by the board. Natural curiosity will demand to know when these battlers for fame, honor and stiff and sore limbs were. None other than Ed L. dieu, well known local merchant, and Bill Wright, local authority on sporting events of all kinds, from back-alley baseball to the world's heavy weight championship.

Have that chimney and furnace cleaned before Spring Cleaning, while the sweep is in town. Stopping at the B. C. Cafe, or phone The Journal 209.

Signs of Spring! Mrs. E. Thomas of West Coleman announces the arrival of a new family of chicks, hatched out on March 3. Last year before the snow had completely disappeared a robin made his appearance at the Thomas home. This year the record is still held with the arrival of the young chicks.

Doing a Good Turn!

Coleman Boy Scouts are selling tickets for a whist drive in Holy Ghost parish hall on Tuesday, to aid a destitute family. Be as generous as possible in buying tickets, the cost being 35c.

FOUND—A pair of glasses in black leather case, right glass missing. Found in West Coleman. Owner will receive same by paying for this advertisement.
